Charlotte,

Let me know if I should convey a response to Tina.

I did not know that IRIS had responded to OCSPP comments and I don't know if OPP and OPPT were satisfied with the responses. If there are still issues, perhaps appropriate parties from OCSPP should meet with Tina and her team to discuss.

Thanks,
Karen

Subject: Following up -- IRIS PFAS Systematic Review Protocol

Hello Karen and OCSPP Colleagues,

Thanks so much for sending OCSPP's comments. We just finished the EPA-wide briefing on this protocol with over a 100 participants. For your reference, I am attaching the responses previously provided to OCSPP on the IRIS Handbook to these same concerns. In order to meet our publicized deadlines and be in a position to be responsive to TSCA's, we plan to move forward to receive public comments on this problem formulation document. But we would be glad to constructively engage with OCSPP on systematic review methods at any time. Please note that all the review/synthesis/integration methods described in this protocol have been recently published in similar protocols for [chloroform](#) (2018), [hexavalent chromium](#) (2019) and [inorganic arsenic](#) (2019), and they are the same as those that received public comment and favorable review by the [NAS in 2018](#). Finally, as you know, the NAS is holding a workshop on Monday-Tuesday on this topic [Evidence Integration in Chemical Assessments](#), which provides a great venue to deliberate the approaches in the scientific community (agenda attached).

Looking forward to a sustained and highly productive partnership.

With warm regards,

Tina

Hi Andrew,

Hope you will accept one more comment from OCSPP received today.

Folks were occupied with other activities.

Deliberative Process / Ex. 5

Thanks for the opportunity to comment.

Karen
